

TSI's construction management services includes various offerings to customers. TSI can act as customer representative providing project oversight acting as eyes ears and auditor. TSI can provide the project execution management where all the contractors and sub contractors are managed by TSI's project management team.

TSI Turn-Key Construction solutions provide complete turnkey construction management that ranges from TSI acting as principal construction contractor in EPC format, or as the EPC project manager of the constructor on behalf of the customer, managed to the degree that fits best with the customers organization.

Benefits of TSI as your EPC Project Manager.

- Experience of TSI's project management team.
- Unbiased position where performance and progress are top priority.
- Cost effective.
- Alignment of priorities and incentives
- Engineering know how in the field during construction.
