

TSI's O&M division provides solutions of scale and scope that fits the customers strategic needs.

With scale ranging from support roles to extensive integrated asset management projects where TSI is accountable for the productive performance, risk management, safety and long term reliability of a producing asset.

TSI provides producers and operators with an alternate solution where TSI offers operations and maintenance integrated services.

Customer Benefits

- Accountability for performance.
- Compliance to regulatory requirements.
- Backed by a strong engineering resource.
- Flexible to operational demands.
- Performance driven by meaningful KPI's

PRODUCTIVITY

SAFETY

RELIABILITY

...at the heart of every successful operation is a fully implemented CMMS... Let TSI help put these resources to work properly.

...safety in operations is achieved through training and education that ensures field personnel technical competence and hazard awareness is second nature...
